

C-FIXS Product Features.

Security Module	Facility Control Module	Equipment Asset Module (cont.)	Parts (Spares) Module (cont.)	PM Standard Task Library Module (cont.)	PM Schedule Generator Module (cont.)
Multi Level Security	Control Facility Level features	Production Line/ Position/ Sequence/ Priority Codes	Parts In Service By Component	Equipment Service Flags	Stream Lined Processing For Large Capacity Transactions
Password Logon	Vendor Master up to 10 user defined elements	Blue Print Information (Print Numbers and Schedule codes)	Perpetual Inventory Part Tracking, PO, WO, Receipts, Adjustments	Meter Reading Flags	Easy to Regenerate PMs as Needed
Unlimited User Logon Profiles	Purchase Order up to 10 user defined elements	Vendor/Sales Rep/Installation information	Labor and Staffing Module	Large Text Area for Detail Instructions	Desk Top Notes Module
Show Active Users	Inventory Master up to 10 user defined elements	Labor Accumulated Cost (Life Time/ This Year/Last Year/MTD)	Track Staff Information	Work Order Module	Easy Notes System
Internet Access Control	Equipment Assets up to 10 user defined elements	Material Accumulated Cost (Life Time/ This Year/Last Year/MTD)	Schedule Hours and Weeks to Work	(10) User Defined Elements	On the Fly Reminders
Logon as Another User	Site Location up to 10 user defined elements	Startup and Shut Down procedures	Schedule Holidays and Vacation Time	Assign (5) Level Location Code	Integrated with Other Modules
Lock and Blank Screen	Area/Level Location up to 10 user defined elements	OSHA and Safety Documentation	Track Sick Time and Time Off	Assign (3) Level Work Order Classification	Easy to Print
Change Your Own Password	Unit Location Master up to 10 user defined elements	(10) User Defined Elements	Time Tracking Impact Ratio on PM Work Order Schedule Generation	Reliability Cause, Delay, Action Code Analysis	User Defined Categories
File Management Module	PO Number Generation	Work Order History Log Tied To Equipment Asset	Track Payroll Information	Priority and Status Codes Assignments	Reports/Graphs Module
Backup/Recovery Procedures	Facility Work Week Schedule Control	Unlimited Meter Readings Configuration At Equipment Asset	Log and Track Certifications and Licensing Credentials	Project Tracking, Work Order , PO, Equipment, Budgets	Industry Standard Crystal Report Interface
View Backup Log Files	Holiday and unplanned shutdown scheduling	SPM (Statistical Preventative Maintenance)	Attendance Records and Exception Work Schedules	Request Orders Convert to Real Work Orders	User Configurable Crystal Reports and User Define Interface
Purge Old Log Files	Excepting Working day opening schedule	Deviation Methods (Median, Mean, Min/Max, Trending)	Track Expiring Certifications and Re-certification Dates	Tenant Control and Tracking	Customize Your Selection Criteria
Restore From Log Files	Preventive Maintenance Cycle Control	Deviation Readings and Accumulative With Rollover Counts	Coding for Skills, Trades and Attendance Codes	Track Labor for In-house, Contractors, Other Services	Modify The Look And Feel
Auto File Repair (Automatic)	G/L interface Module with closing process and journal entries	Skill Codes Assigned to Reading Methods	Purchasing Module	Track Parts Used and Tools Needed	Report Range Selections
Index Management (Automatic)	Allow Employee Attendance Hours	Reading Events (Manual/Handheld/Signal)	Track POs back to Work Orders Projects	Allow Non-Stock Part Assignment	Preview To Display Prior to Print
Full Relational Database	Allow PMs to be scheduled on Facility Exception Work Days	Synchronize PM Tasks Back to Your Standard Task Library	(10) User Defined Elements	Parts Tracked back to PO Approval	All Reports Can Be Exported To Text, ASCII File
Record count Analysis	Allow SPM Deviation	Re-Sequence Task Numbering	Unlimited Line Items	Large Text Areas For Real Notes	Page Range Printing
System Level	Five (5) levels Site location control with visual Tree branching	Assign Meter Tasks Tied to Meter Rules and Skills	Order Stock and Non-Stock Items	Estimated and Actual Time Tracking To Skill Level At Each Task	Dynamic Report Builder Allows for Hundreds of Customized Reports
Tear Away Tool Menu	Three (3) levels of Unit Classification control with visual Tree branching	Mass Copy Equipment for Faster Input	Associated Line with Work Order	Weather Condition Tracking During WO Issuance and Completion	Customize Your Dynamic Reports On the Fly
User Defined Menu Option	Equipment Asset Module	Tag and Print Equipment Detail Sheets	Set Default Receiving Location	Unlimited Documentation/Image Links to Work Orders	Analysis Reporting With Predefined Reports
Icon, Text or Both On Menu Options	Assign (5) Level Location Code	Parts (Spares) Module	Associated Line with Equipment Assets	Track Unlimited Delay Codes Per WO	Inventory Transaction History Reports
Dockable Tool Menu	Assign (3) Level Equipment Classification	Assign (5) Level Location Codes (Unlimited)	Assign Accounting Codes Dynamically	Mass Assign to and Assigned By with Mouse Click	Productive Hour Analysis Reports
Calendar Scheduling 9 month screen view	Attach Standard PM Tasks - Unlimited	Assign (3) Level Equipment Classification	Unlimited Vendor Master Records	Work Order Browse Table Icon Status for Quick Reference	Inventory Stock Status Reports By (parts/Location)
Pull Down Menu System Icon Driven	Assign Standard And Actual Costs	Minimum Order Quantity	Vendor Master Memo Notes - Unlimited	Easy and Flexible One Screen Generation	Report Wizard Develops on the Fly ad-hoc Reports (All Tables)
Cut/Copy/Paste Throughout System	Actual Equipment Asset Cost Log History Tracking	Standard Order Quantity	Vendor Master Associated Equipment Table - Unlimited	Override System Level Generation Option	Export Data Tables to HTML Web pages or Excel Spread Sheets
Table-Form driven logic flow	Unlimited Components and Component Parts (Spares)	On Order Quantity	Vendor Master Associated Inventory Parts Table - Unlimited	Push Dates Out During Generation	Dynamic Graph Builder Allows for Hundreds of Custom Graphs/Charts
Fuzzy Search Ability (All Tables)	Related Equipment Links	Committed Quantity	Vendor Master Associated Equipment Service By This Vendor - Unlimited	Manage Labor Impact By Skill and Equipment	
Query Wizard (Primary Tables)	Unlimited Documentation/Image Links to Equipment Asset	Vendor Part Cross Reference Numbering	PM Standard Task Library Module	Bar Graph for Visual Impact Analysis	
Spread Sheet Wizard (Primary Tables)	Contracted Service History and Logs	ABC Category	User Defined Task Types and Task Codes	PM Schedule Generator Module	
View Wizard (Primary Tables)	Unlimited Related Equipment Asset Tools Needed for servicing	Transaction History Logs	Tasks Assigned By Daily, Fixed or Floating Schedules	Real-time Ratio Analysis Of Available to Needed Labor	
Visualize and Browse Tables with Tree and Branch Logic (Primary Tables)	Unlimited Locations Service by Equipment Assets	Physical Inventory Control and Logs	Frequency and Duration Scheduling	Mouse Click Tagging On and Off PM Demands	
All Modules are Fully Integrated	Meter Reading History	FIFO/LIFO, Weighted Average Cost History	Associate Unlimited Standard Note Codes per Task	Print Impact Forecast Prior To Generation Of Work Orders	
All Date Lookups Have Calendar Popups	Cost Center, Department and Accounting Codes Tracked	(10) User Defined Elements	Assign Unlimited Skills and Estimated Time to Complete	Group and Manipulate Tasks Prior to Work Order Generation
